Trump's Tweets (cont'd)

In `homework_06` I explored Trump's tweets related to China. In this homework, I would like to continue working on his tweets. First, let's do some exploratory analysis to see how many favourites and retweets did he get.

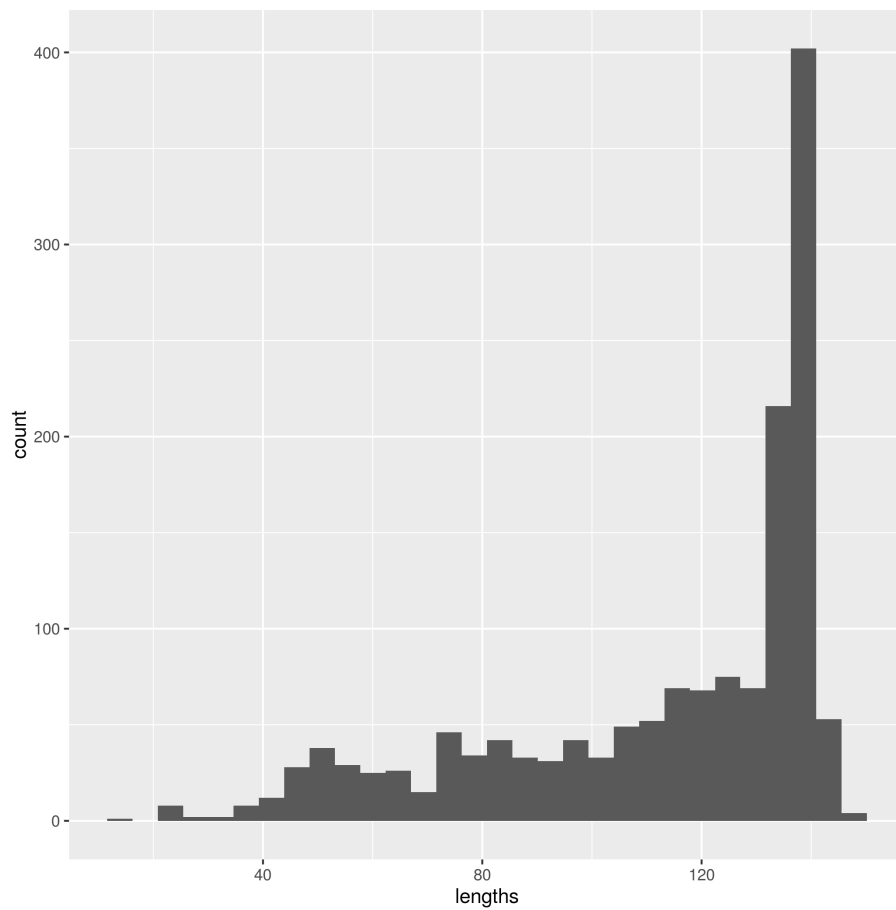

Fig. 1 A histogram of lengths of Trump's tweets

And here is a plot of how long are his tweets.

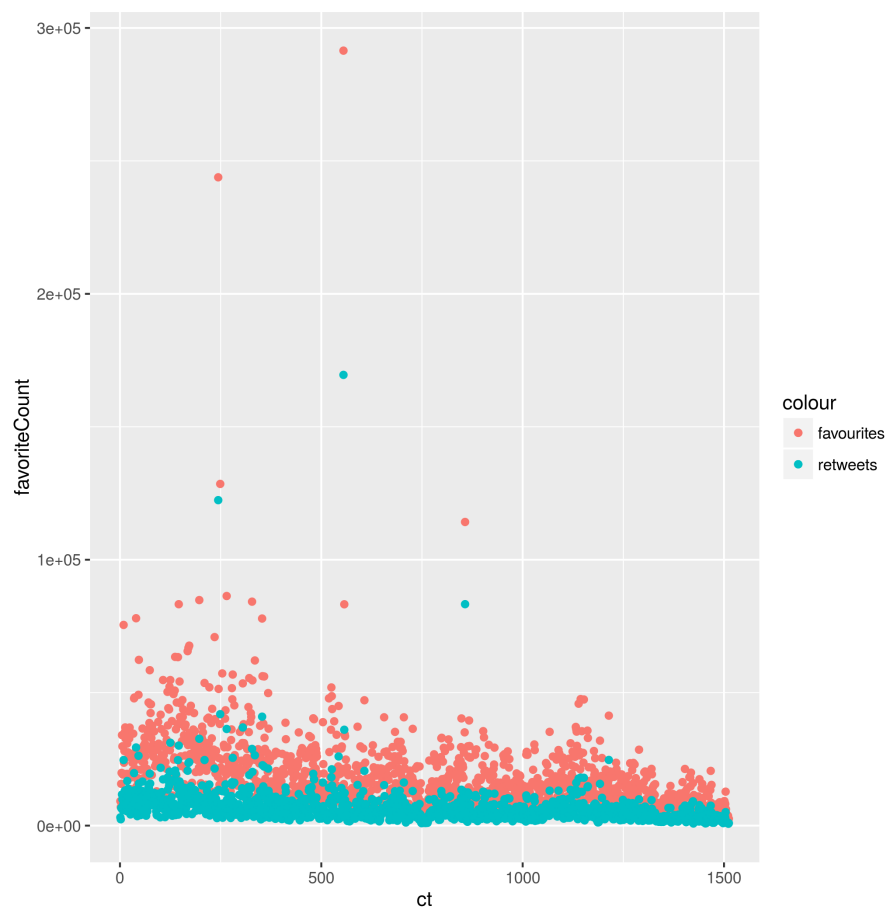

Fig. 2 A plot of number of favorites and retweets of Trump's tweets

Now I am interested in what is the most popular tweet of Trump and what is his shortest tweet.

There is one tweet with most favorites and retweets, and it should be considered as the most popular one.

```
## [1] "How long did it take your staff of 823 people to think that up--and where are your 3
```

```
BRAVO!!!
```

Now let's see what is the shortest tweet.

```
## [1] "AMERICA FIRST!"
```

LOL I thought it might be simply "MAGA!"

Reflection

Although the advantage of **Makefile** is not very obvious here, I can feel that it will be extremely useful when dealing with a large project. I really learning this technique.
